

Changes: (28/04/2018)

The landing/index page looks like this now:

Welcome to Machine Learning Playground

What do you want to do?

[Classification](#)

[Regression](#)

The user can now select either classification & regression

Welcome to Machine Learning Playground

Upload your CSV to play around with!

Choose File

No file chosen

✓ Random Forest

SVM

Stochastic Gradient Descent

Multi Layer Perceptron

K Nearest Neighbors

K Means Clustering

Decision Trees

Gradient Boosting Classifier

Naive Bayes

Let's do this!

Instructions:

- Please make sure that you are using a clean CSV. It should not contain any NAN, none or text values.
- There are no pre-processing steps involved in this application, so please do upload clean CSVs
- Please arrange the CSV such that the target feature is the first column of the CSV. The application is c features. Not doing so could crash the application.

Linear Regression

Let's do this!

Instructions:

- Please make sure that you are using a clean CSV. It should not contain any NAN, none or text values.
- There are no pre-processing steps involved in this application, so please do upload clean CSVs
- Please arrange the CSV such that the target feature is the first column of the CSV. The application is c features. Not doing so could crash the application.

[Go Back!](#)

I've added go back buttons on all pages. The Bokeh Server now looks like this:
